

MagniTube

MAG-T-80W

MAGNICOLOR

Bendable, bright white light that makes not-so-sexy fixtures like vacuum canopies look like the pearly gates of heaven.

(Imagine if George Lucas had this LED tube light for his Light-Saber tech)

construction & installation

MagniTube bendable LED light fixture is now available in bright white! The tube itself is polycarbonate, which has way better tensile strength or scratch resistance than other PVC or co-polyester tubes available on the market. Because it's also lightweight, our installation techs typically only need 1" EMT/pipe straps or polyethylene terephthalate ratcheting strips... another fancy word for good 'old plastic zip ties.

electrical & operations

The 8ft MagniTube 12k tube fixture produces 12,200 lumens while only using 61W of power. It also has internal multi-tap drivers capable of receiving power from 100v to 305V. Did we mention it's durable? It can operate in a wide range of temperatures between -20 and 40 degrees Celsius thanks to high-efficacy LED chips that maintain an overall cool fixture temperature.

practical applications

MagniTube is the perfect way to add a burst of bright white to linear features inside and outdoors at your facility. Car Wash owners especially love how it enhances and brightens tunnels, vacuums, SS bays, or canopies. Plus, with only 60W consumption, save \$\$\$ on your monthly electric bill!

product specifications

Power	61 Watts
Beam Angle	270 Degrees
Input Voltage	AC100-305V
Lamp Size	7.5' x 1" x 6" whip
Weight	1 LB
Finish Color	White/Transparent

Waterproof Grade	IP65
Power Factor	>0.5@100V >0.29 @305V
Life Span	50,000 Hours
Fixture Material	Polycarbonate
Manufacturer's Warranty	3 Years
